MOUNTAIN SERIES

WILD | TI | CARBON | ROCKY | VARMINT | VARMINT LIGHT | XT

ACTIONS: 416 STAINLESS STEEL or TITANIUM depending on the model. Manufactured with integrated **20 MOA bases** and **recoil lug**. All Mountain models are the improved and lighter design from 2024.

BOLT is a 3-lug design to allow for a 70-degree bolt lift. Creating less

LIMBSAVER RECOIL PAD

3 position **SAFETY**

Adjustable **TRIGGER** set at 2.75 lbs in the factory.

DETACHABLE MAGAZINES have a 4-cartridge capacity
*(*Except for the .338 Lapua & 28 Nosler which holds 3, .300 PRC is also recommended.)*

RIFLE STOCKS are constructed from Carbon fibre
(7 stock options available.)

Rifle shown in the Trophy colour scheme

ACCURACY CERTIFIED

Every Mountain Rifle is tested and certified at our indoor range.

Antler Certified: The rifle will shoot a **3-shoot group** measuring **½ MOA at 100 yards** with quality hunting ammunition. All rifles come with a target showing it passed certification and the factory ammunitions used. Ensuring every rifle is ½ MOA certified.

CERAKOTE for added protection

SIDE PORT

SPIRAL FLUTED 416 STAINLESS STEEL BARRELS

M42 RADIAL MUZZLE BRAKE *(included)*

CARBON FIBRE BARRELS

THREAD PROTECTOR *(Optional)*

VARMINT MOUNTAIN SERIES have a barrel diameter of .900 inches.

DESIGN FEATURES OF THE MOUNTAIN SERIES

All firearms are manufactured with precision and rigor

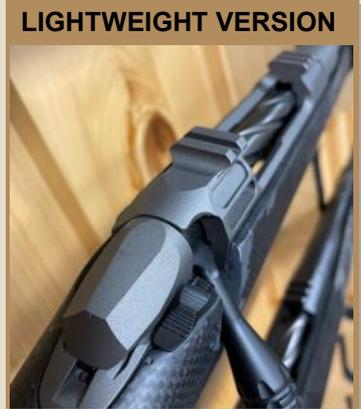

Every Mountain rifle is designed with excellence in mind at every stage of the manufacturing process. Strict quality control checks are carried out during the machining process using high precision instruments such as CMMs and optical comparators. This is all done to ensure compliance with the extremely tight tolerances for each component on every Mountain rifle.

ACTION

416 STAINLESS STEEL: PERFECT BALANCE OF STRENGTH AND RIGIDITY

TITANIUM : STRENGTH AND RIGIDITY with weight savings. 50% lighter while maintaining the same level of strength.

Manufactured with integrated 20 MOA bases and recoil lug. This one-piece machining process significantly reduces vibration during firing, thereby increasing accuracy. Our Mountain models are assembled with our latest weight saving design.

THE BARREL

SPIRAL FLUTED 416 STAINLESS STEEL BARREL

THE ART OF PRECISION

Made from premium 416 stainless steel with signature spiral fluting for a sophisticated look. Our stainless steel barrels are machined using the "button rifling" method, a manufacturing method that minimizes internal stresses, reduces marring, provides optimal barrel diameter, and accuracy. The spiral design is not just for aesthetics: it reduces **the overall weight** of the barrel and promotes **more efficient heat dissipation**.

CARBON FIBRE BARREL

FUSION OF TECHNOLOGY AND PERFORMANCE

The manufacturing process of our carbon fibre barrel consists of machining down a stainless-steel barrel, wrapping it in carbon fibre and bonding it with a high-performance resin. The fibre is applied under high temperature along the entire length of the barrel, wound on three separate axis, ensuring perfect adhesion of each strand and an optimal fusion between the steel and carbon. The result? A unified cylindrical body, stiffer and lighter than a stainless-steel barrel of the same diameter, offering superior accuracy and **accelerated heat dissipation**.

MB42 MUZZLE BRAKE

The MB42 features 42 transverse holes that direct the gases away from the rifle at a 15 degree forward angle. Reducing recoil by 50% and directing noise from the muzzle blast away from the shooter.

SIDE PORT MUZZLE *(Optional)*

The side port muzzle brake features the tactical style ports on either side of the muzzle device. This helps reduce dust and debris when shooting prone.

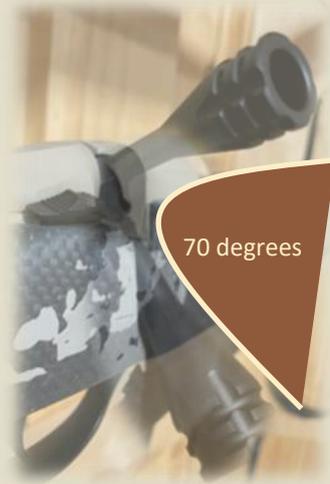

ACCURACY

Accuracy testing is conducted year-round in our underground facility. Ensuring that every rifle meets or exceeds the Antler Arms accuracy certification.

THE BOLT

A 3-lug spiral fluted bolt, with a 70 degree bolt throw. The advantage to this construction is that it provides more space between the rifle scope and bolt handle. Making it easier and faster to cycle. Which can be critical in hunting situations.

ANTLERARMS.COM

NEW FOR 2026

MOUNTAIN XT

ACTION: TITANIUM | BARREL: CARBON FIBRE

*When the Mountain demands the best -
ANTLER pushes to the highest peak!*

The Mountain XT is the most advanced version of the Mountain Series—a signature rifle designed for those who want to go hunting without compromise.

Its ultralight titanium action and multi-layered carbon barrel offer the perfect combination of strength, precision, and weight savings, even in the most demanding environments. Reliable, stable, and perfectly balanced.

WEIGHT: 6.4 lbs*

ELEMENTS	FUNCTION	ADVANTAGES
ARCA RAIL 	For mounting your rifle on a tripod without having to remove your bipod.	Allows the hunter to easily switch from prone shooting to shooting from a tripod.
INTEGRATED FLUSH CUPS 	Recessed attachment points for slings.	Offers quick, quiet, and adjustable carry options. Adaptable to your hunting or shooting style.
PICATINNY RAIL 	Attach a bipod to the forend. Includes a built-in flush cup for sling attachment.	The hunter can adapt to uneven terrain (rocks, grass, changes in elevation) without losing their line of sight. Improves stability, reduces fatigue. Perfect for long-range shooting.

SIGNATURE
MODEL

The Mountain XT is ready to perform — from the first shot to last light.

With its **picatinny rail**, **arca rail**, and **integrated flush cups**, it delivers full modularity and instant adaptation to your environment.

VARMINT MOUNTAIN LIGHT

ACTION: TITANIUM

BARREL: 416 STAINLESS STEEL HEAVY-PROFILE WITH SPIRAL-FLUTING

Same benefits, just lighter

This rifle was designed for varmint hunters who prefer a lighter overall package. It carries the DNA of the Varmint and swaps in a titanium action. Built to make rough terrain, long days, and mobile blind setups easier to tackle. Weight: 7.4 lbs*

Rifle shown in the Hunter Orange colour scheme

* The weights of the Varmint models are calculated using a 6mm Creedmoor with 22" barrel. For stocks with adjustable cheek piece, add 0.5lb

CERTIFIED : Varmint model carries the same certification as all other Mountain series rifles.

3-shoot group measuring ½ MOA at 100 yards with quality hunting ammunition.

ANTLERARMS.COM

NEW COLOURS FOR 2026

2026 Trend – The Call of Natural Forces

Our new colour set embodies a return to the essentials: light and movement. Each colour tells a story — forged carbon shaped by precision, fire igniting passion, northern winds carving purity, and the Canadian pride that inspires our creations.

CANADIAN

A warm shade inspired by Canadian autumns. Marked by the maple leaf. It embodies passion, pride, and the spirit of ANTLER.

SILVER FIRE

A fiery red intensified by the richness of silver, like an furious ember ready to unleash its full power.

THUNDERSTORM

A striking contrast of white, grey, and black. Inspired by snowy northern landscapes, both elegant and stealthy. This colour blends naturally into wide open northern spaces with discretion and efficiency.

FORGED CARBON *

A weave where the fibres blend together, creating a living, organic pattern. It combines the strength of carbon with the fluidity of movement — a finish that is both modern and timeless.

* Available exclusively in the Mountain Series, without a cheek piece

EACH SET: ACTION | BARREL | MUZZLE BRAKE

Available in the colour of the SET or BLACK

COLOUR SET

Timeless

A selection crafted to endure through the seasons and years without ever losing its elegance. These refined, understated tones embody controlled simplicity, quiet discretion, and natural class—designed for hunters who seek colours that never go out of style.

PHANTOM

A metallic gray inspired by cliffs and misty mornings. Silent and precise, this shade fades into the background.

TROPHY

Featuring bronze and natural tan this choice is elegant but also resembles the noble colour of game animals. Perfectly balancing both power and discretion.

OD GREEN

A subtle blend of forest green and deep black. Perfectly suited for woodland environments. Built for the wilderness with a natural camouflage.

EACH SET: ACTION | BARREL | MUZZLE BRAKE
Available in the colour of the SET or BLACK

COLOUR SET

Vibrant Autumn

This palette celebrates the energy and vitality of the great outdoors in autumn — a season when nature expresses itself fully, with golden light, crisp air, and vibrant colours.

SKY

A luminous sky blue fused with black, evoking fresh air, open spaces, and a bold modern spirit.

GRASS

A vibrant green between fresh foliage and wild instinct — embodying life, nature, and spontaneity.

HUNTER ORANGE

This bright orange is inspired by the autumn landscapes and North American hunting traditions. It embodies passion, vigilance, and performance.

SANGRIA

A rich, vibrant magenta with red-purple highlights, paired with black. Radiating elegance and character.

EACH SET: ACTION | BARREL | MUZZLE BRAKE
Available in the colour of the SET or BLACK

COLOUR SET

Natural Colour Sets

A palette rooted in the raw beauty of the earth. These tones draw their inspiration from forests, trails, and wild landscapes that remind us of where we come from.

GOLDEN FOREST

A harmonious blend of forest green and sand. Inspired by leaf-covered paths and light-filled undergrowth.

BEAR

A soft sandy beige that blends naturally into the landscape subtle, solid, and quiet strong.

COYOTE

A blend of coyote tan and warm earthy brown inspired by desert expanses and arid terrain.

PRAIRIE

A subtle blend of mineral grey, golden hues, and warm brown. Inspired by wind-swept fields, this tone reflects endurance, wisdom, and the quiet memory of time.

EACH SET: ACTION | BARREL | MUZZLE BRAKE
Available in the colour of the SET or BLACK

CRAFTSMANSHIP MEETS PRECISION

When every detail matters, nothing is left to chance.

CERAKOTE COATING

PROTECTIVE | AESTHETIC | DURABLE

The most effective coating on the market against corrosion and scratches. It enhances smoothness and reduces friction keeping your rifle ready, even in the most demanding conditions.

INTERNAL EDM CUT

PRECISION | CONSISTENCY | RELIABILITY

Machined using EDM wire cutting technology. This manufacturing process achieves a precision of **0.0004 inches**. — one of the tightest tolerances in the industry. Each component is perfectly fitted, without compromise.

QUALITY CONTROL

RIGOR | ACCURACY | CONFIDENCE

Throughout the entire process, our experts inspect each component using CMM's and optical comparators. Tight tolerances ensure consistent performance and uncompromising safety.

OUR CARBON FIBRE STOCKS STABLE | WATERPROOF | DURABLE

An essential asset for optimal precision!

Hand-crafted and reinforced at strategic points, our stocks offer **three times the rigidity of wood** while reducing overall **weight by 50%**. Unaffected by climate variations, they maintain their stability — shot after shot.

*At ANTLER,
precision is not a
promise.*

*It is a requirement —
engraved into every
component!*

**At ANTLER,
every rifle
carries a SOUL**

EVERY RIFLE TELLS A STORY...

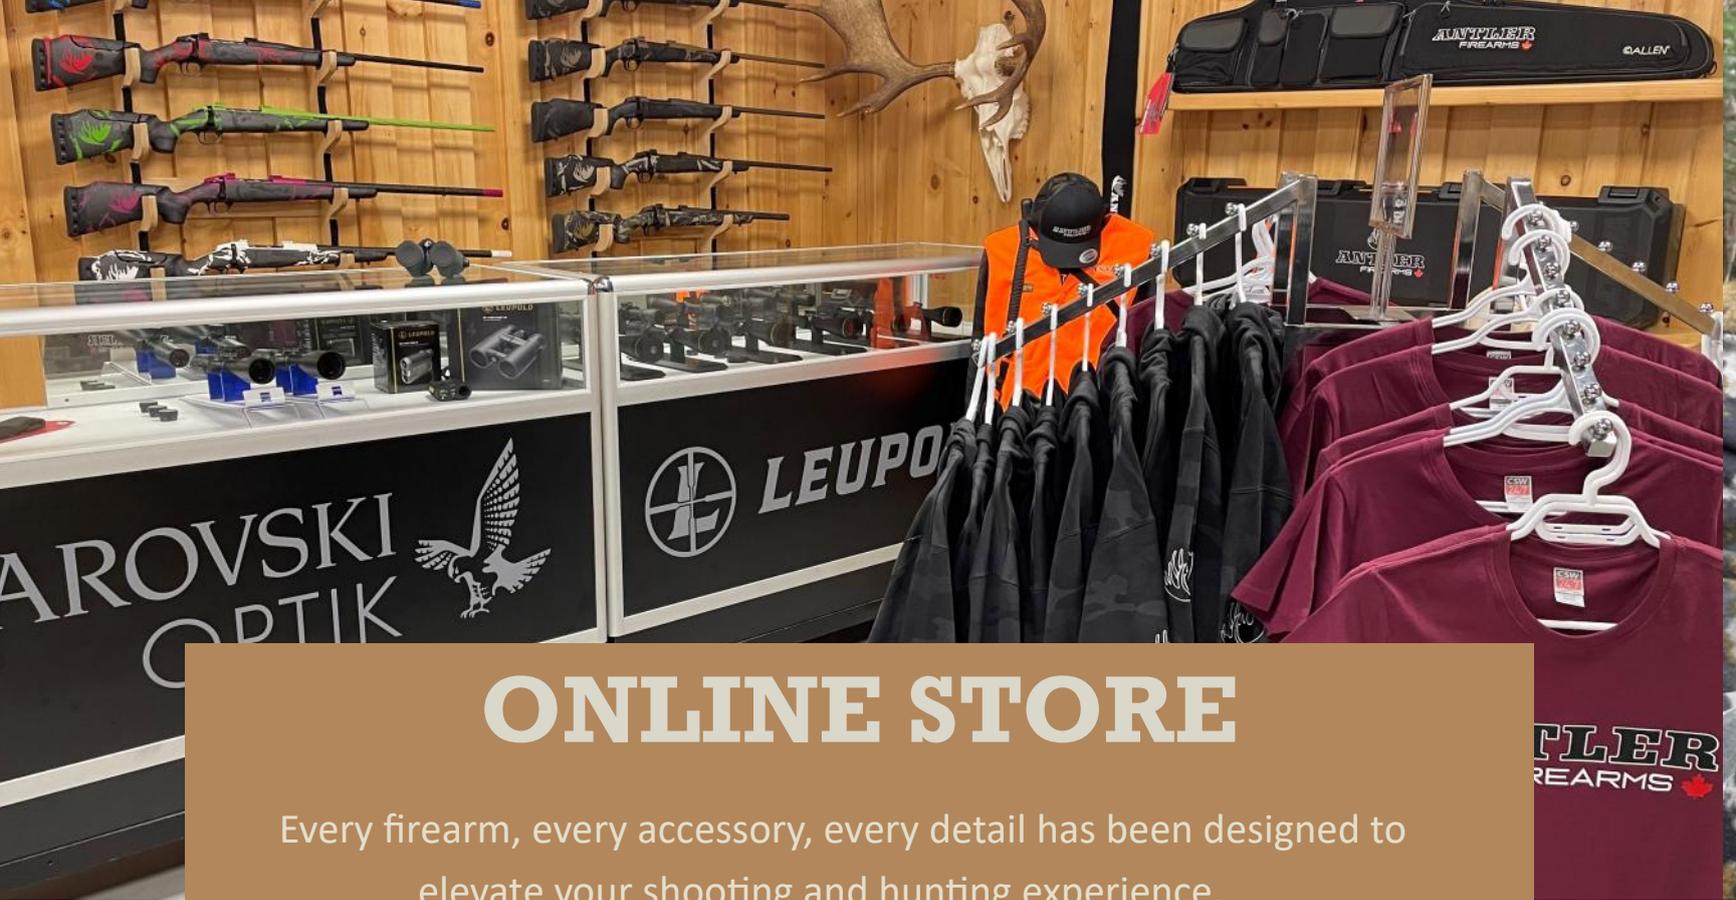

Ours as much as yours. We are a passionate team of precision-machining experts who understand the realities of hunting and design rifles built by hunters, for hunters. Since 2014, we have dedicated our expertise to one purpose: creating rifles that inspire true confidence, season after season.

We are a 100% Canadian company, born from the union of precision machinists, seasoned engineers, and devoted hunters. Together, we have developed rifles that blend robustness, precision, safety, elegance, and durability.

Our rifles have been tested and proven in extreme hunting conditions. Every component, every fit, every coating has been carefully considered so that you can rely on your rifle — year after year. We know a rifle must inspire absolute confidence, no matter the weather, the terrain, or the distance.

Every detail has been designed, refined, and perfected with one goal in mind: to deliver a shooting experience that meets — and exceeds — your expectations.

Antler is more than a name. It is a promise: to offer a rifle of superior quality, durability, performance, and precision — built to withstand everything... except doubt.
